## SKILLS

- ❖ Python
- ❖ C (basic)
- ❖ HTML, CSS, JavaScript
- ❖ Django
- ❖ React JS

## EDUCATION

- ❖ NED University of Engineering & Technology | Main Branch *CGPA: 3.44*
- ❖ XII (BIEK) | Government Dehli College *87.2% | 2023*
- ❖ X (BSEK) | U&V School System *93.4% | 2021*

## ACADEMIC PROJECTS

### ❖ GYM ECOMMERCE WEBSITE

The Gym E-commerce Website is a modern online platform developed to provide users with a seamless shopping experience for fitness products. It allows users to browse a wide range of items, add their desired products to the cart, & complete secure checkouts with ease. Built with Django on the backend and React on the frontend, the website ensures fast performance, efficient data handling & a user-friendly interface.

### ❖ WEATHER APPLICATION USING API REAL TIME DATA

This project fetches real-time weather data for any city using the Open Weather API. It stores both raw and processed data, raises Zenity pop-up alerts for extreme temperatures, and calculates average temperature after every 24 readings. City input is dynamic via shell script, and the process can be automated using automation.sh with cron job support.

## POSITION OF RESPONSIBILITY
